

Mind & Memory Care

PRICING GUIDE

The cost to live at our communities varies depending on the needs of each resident. To make it easier to understand, we have broken it down into steps for you.

STEP 1	STEP 2	STEP 3	STEP 4	STEP 5
CHOOSE YOUR APARTMENT	NURSING ASSESSMENT	CARE LEVEL*	PERSONAL SERVICE	COMMUNITY FEE
<p>The style/size of the room you will live in. (Price per person)</p>	<p>To help us better understand your personal care needs, we will schedule time for a nurse to meet with you to review your current needs. We will either have virtual meeting, we will come to you or you are welcome to come to our community.</p>	<p>The nursing assessment will determine what level of care needed.</p>	<p>Additional services that may be required.</p>	<p>Community Fee covers Nursing Assessment, Move-In Support, etc. Please consult with our Executive Director for more detail.</p>

Mind & Memory Care Plan

Our Mind & Memory Plan is designed for residents whose care needs consist primarily of cueing and reminders and who require little or no physical assistance with activities of daily living. Residents are appropriate for our Mind & Memory Care Plan if they generally exhibit mild cognitive impairment and no or limited behaviors that would require substantial increases in staff time, such as aggression or resistance to care.

OUR MIND & MEMORY I PLAN is designed for residents whose care needs consist primarily of a minimal level of physical assistance with activities of daily living, and who generally exhibit a minimal level of cognitive impairment. These residents may also display one or more behaviors, such as aggression or resistance to care, that would call for additional staff time and attention.

OUR MIND & MEMORY II PLAN is designed for residents whose care needs require a moderate amount of physical assistance with several activities of daily living, and who generally exhibit moderate cognitive impairment and/or associated behaviors.

OUR MIND & MEMORY III PLAN is designed for residents whose care needs require a substantial amount of physical assistance with several activities of daily living, and who generally exhibit severe cognitive impairment and/or associated behaviors. Residents requiring the assistance of two community associates for transfers on an ongoing basis would be on Level III or higher, at a minimum.

OUR MIND & MEMORY IV PLAN is designed for residents who have extensive needs, for example: a need for total care with one or more activities of daily living, or a substantial amount of assistance is warranted on a daily basis. A resident using a mechanical or electric lift on an on-going basis for transfers would be on Level IV, at a minimum.

OUR MIND & MEMORY V PLAN is designed for residents who need total assistance with all aspects of care (including dining), as well as usage of a mechanical or electrical lift for transfers on an ongoing basis. They may also require extensive emotional/behavioral support.

Personal Services

MEDICATION MANAGEMENT LEVEL 1

Assistance with and/or administration of medications, one to three times per day.

MEDICATION MANAGEMENT LEVEL 2

Assistance with and/or administration of medications, four or more times per day.

CONTINENCE MANAGEMENT LEVEL 1

Provides the products required for residents with light to moderate bladder incontinence, 7 episodes per week; not more frequently at night. These residents typically wear protective underwear or a bladder pad. Products required for continence management, based on assessed need.

CONTINENCE MANAGEMENT LEVEL 2

Provides the products required for residents who are incontinent with bladder and bowel and are frequently or always bladder incontinent at night. These residents typically require protective underwear during the day and a brief overnight, or a brief 24 hours a day. Products required for continence management, based on assessed need.

*We do not offer skilled nursing services.
